The Blue Penguin

Many people share their homes with animals. We usually live with pets such as dogs, cats, turtles, and goldfish. However, the people on Ames Street in the South Island of New Zealand live with blue penguins.

Blue penguins are the smallest penguins in the world. They are just over 30 cm tall and weigh around 1 kg. They usually build nests in tall grass, between rocks, or underground. The nest is their home for their whole lives.

Long ago, there were no people in the area where blue penguins lived. One day, people came there and they cleared the land. They cut down the tall grass and took away the rocks. They built houses near the sea. As a result, many penguins died. However, some penguins built their nests again in gardens and spaces under the houses.

Now, about 50 penguins live under the homes on Ames Street. It is safe for them because they don't have to cross any roads. The penguins walk from the house to the sea early in the morning and come back after dark. For this reason, people don't often see them.

But, it is easy to know if you have penguins living under your house. They are noisy and smelly, especially around Christmas time when the baby chicks are growing bigger. Also, they get angry when they hear loud sounds such as rock music or loud talking.

Although penguins are not easy to live with, the people on Ames Street welcome their unusual animal housemates. After all, the penguins were there first.

- No. 14 The blue penguins are
- A) the world's smallest penguin.
 - B) pets inside people's homes.
 - C) a little under 30 cm tall.

Which do you like better, summer vacation or winter vacation?

Answer the question and give TWO reasons. You must write 25 words or more.

I like winter vacation better. Firstly, it's exciting to take a trip to the snow

family every New Year. I think this is why I look forward to winter vacation
so much.
