[D] 次の英文の内容に関して、No. 14~15 は文を完成させるのに最も適切なものを、A,B,C,Dの中から1つ選び、記号で答えなさい。また、No. 16~18 は質問に英語で答えなさい。

The Rubik's Cube

The Rubik's Cube is the best-selling toy of all time. Over 300 million of them have been sold. However, the idea for the Rubik's Cube didn't come from a worker in a toy company, it came from a university professor.

Professor Erno Rubik is Hungarian. In 1974, he was teaching at a university. He wanted to teach his students how shapes move, so he decided to make a puzzle. First, he cut some wood into small blocks and made a hole in them. Then he joined them together. You could turn them by hand and see how they moved. The puzzle looked like a large cube; three blocks high, three deep and three wide. It was simple and had no colors, but his students liked it very much. He called it the Magic Cube.

In 1979, Rubik sold his idea to a US toy company. One year later, the puzzle was sold in toy stores. It was different from the one he made for his students in some points; it was made of plastic and it was colorful. It also had a new name, the 'Rubik's Cube'. It was an international hit and won many awards.

The toy is simple. By turning the squares, you can mix up the colors. You are finished when each side of the cube is one color. Some players are very fast. If you want to get faster, you can use a teaching guide. There are many books and how-to videos. The latest type is an online application that you can use with your mobile phone. If you want to be the fastest in the world, your record should be less than 3.47 seconds.

TOPIC

Which do you like better, eating at a restaurant or eating at home?

Answer the question and give TWO reasons. You must write 25 words or more.

I like eating at home better. I have two reasons. First, my mother's food is

delicious! I enjoy eating her food. My favorite is curry rice. Second, eating

at home makes me happy because I can talk with my family at the table.

We talk about our day and our plans. For these two reasons, eating at home

is fun for me.
